### **What's New In AutoCAD?**

Improved workflow: With an intuitive design interface and an updated design engine, you can manage your entire project, add new features, modify existing ones, and synchronize your drawings with the cloud. Seamless 2D and 3D interoperability: Send models from 2D CAD to 3D software or vice versa, on-the-fly. You can even simultaneously work on separate drawings in 2D and 3D. Improved 2D drafting: New 2D perspective and wireframe tools enable you to produce clean, clear and readable plans, sections, details and 3D animations that are easily readable and understood. Simplified 3D modeling: Using the updated CAD engine, you can create more complex 3D designs that deliver higher quality. Higher performance: The new design engine is more robust and faster, allowing you to create more, larger, and more detailed designs. Extended features: With the new extension manager, you can customize AutoCAD to your exact needs, easily install and remove them, and instantly share drawings with others. Advanced 2D technology: With new 2D functionality, you can add annotations, edit shapes, and create gridlines with a single click. More creative design features: In addition to the many modeling tools and drafting features, AutoCAD 2023 now has new flexible features, such as shape-based drawing. This enables you to create complex designs that are easy to modify, update and maintain. Markup Import and Markup Assist You can import different types of feedback, such as text, images, and drawings, and add them to your AutoCAD drawings in one easy step. Text and image feedback will appear as annotation with dynamic colors, line type and width, and so on, depending on the type of feedback. You can also use markup to annotate with interactive content, such as hyperlinks, buttons, shapes, and colors. Insert and generate interactive annotations in drawings. Markup Assist now automatically sends feedback to files with markups, creating them on-the-fly. You can simply upload files with markups and feed them into your AutoCAD drawings in one step. AutoCAD will automatically handle sending and incorporating the feedback. This includes changing fonts, text type, color, and line type. Markups are generated and inserted
