1.Play Style: There are several different ways to approach the game. The main way for first-timers is to spend a great amount of time to figure out the mechanics of the game, and spend even longer practicing on character creation. However, it will be very difficult to understand the game fully until you have made mistakes in the beginning. There is also a way to play more adventurously as you gain experience. Tarnished classes are available that quickly level up in battle. The Warrior class can enjoy excitement that the

other classes cannot without a large amount of experience. The real difficulty is to understand the design of the game through the combination of multiple types of action with an RPG background. You should try hard to get all the parts and then play the game as it is the best way to complete the game smoothly.

2. Character Creation: Your character is created with customizable aspects. You can decide how your character will look and how you will develop your character. You will be able to choose your gender and various abilities based on the class that you select in the character creation screen. Whether the class is a melee or ranged weapon, make use of your abilities and abilities of the weapon. You can also select special effects that can be used in battle. Boys and girls both enjoy creating their own fantasy warrior.

3. Game Flow:

- You will get into a stable state of the game according to your play style and knowledge.
- You will make mistakes during the initial

stages as you are unfamiliar with the game and you will learn through games. • You will be able to experience full story of the game smoothly. • You will be able to enjoy the game more in a series of battles and play. 4. Action System: The basic action of the game is similar to a system in action RPG. You attack enemies by using the Dual Wielding attack, Chain Attack, and Casting a spell. You can select various weapons and abilities. You can also use different combinations of the weapons and abilities. It is more difficult to control the flow of the game with a long term attack since it takes time to prepare your next attack for the next attack. 5. Equipment: You will get both short term and long term equipment. Inventory, Inventory Management, and Item Management are integrated. You can use the items that you equip and bff6bb2d33
