Downloadamtemu .Q: How to set the width of the view in a UIScrollView I have a UIScrollView, and I want to set the width of the scroll view. I tried the following code, but it didn't work: `const int width = 250; self.scrollView.contentSize = CGSizeMake(width * view.frame.size.width, view.frame.size.height);` When I run the app, the scroll view is not moving. A: Probably because you are giving a value that is not what the scroll view is expecting. You need to multiply by the size of the view, not divide by the size of the view.

`self.scrollView.contentSize = CGSizeMake(width * view.frame.size.width, view.frame.size.height);` Q: Magento 2: Change position of price in product page/product list Currently, in Product details page, the price is listed as "Price From:" - "Price To" in the bottom of the table. i want to move the "Price From:" and "Price To:" to the top of the table. How can i achieve this in Magento2? A: In Stores > Configuration > Catalog > Pricing, Scroll down to the Frontend Product Listing section. Then, under "Price from" on the left, enter "Price" in the first text box and "Price to" in the next text box. Save. Hope it helps.
