I would love to see an update with color coded or grid appointments, calendars and contacts; and an option to show/hide all my personal calendar items. I would love to use Cozi on my Palm Tungsten and put this as a second device to sync. I have been working on all my contacts, calendars and tasks for many months. But this app is looking only to be a device only to be notified of my appointments, not to manage them. I still use my Palm for that. I am afraid that Cozi will "burn" me out and I will have to spend more money to purchase other Apps that will do what this Cozi app is not: managing my calendar, contacts and tasks. I have purchased many apps for my Palm and they all work very well with no problems. Reviewbad 5 By jivkuk
