Currently in its 17th edition, the tournament goes on until November 23. Among its successful protagonists we find the 2007 champions Atlético Mineiro, who won the tournament twice, in 2010 and 2011. The club that have had the most success in the competition, the Sport Club Internacional (SCI), also has the most important European record. In fact, the South American team has won the

Champions League 12 times, being crowned champion of Europe five times. The three most important competitions in the league are the Rio-São Paulo, Flamengo-Rio and BH3, which was inaugurated in 1978.Evaluation of the relative susceptibility of the feline myocardium to ischemic necrosis by sequential colloidal carbon angioplasty and ligation in the cat. We investigated the

effects of sequential arterial clamping and platinum-tipped microcatheter-guided coronary colloidal carbon (CC) angioplasty and ligation on the infarct-related coronary artery in dogs and the feline myocardium in vivo. Two CC angioplasty catheters with diameters of 1.5 and 2.0 mm, respectively, were implanted in the left anterior descending coronary artery (LAD) for a cumulative dose of 0.5, 1.0, 2.5, and 5.0 mm(3) of CC at sites distal to a silver clip. Ligation was performed by using the

same microcatheter with CC at the predetermined site distal to the silver clip. Twenty-one anesthetized cats were subjected to 30-minute (Group 1) or 45-minute (Group 2) left anterior descending coronary artery occlusion followed by 60-minute reperfusion. The resultant myocardial infarct size was measured in a point by point fashion as an infarct/risky area ratio (I/R). In Group 1, 10 of the 12 cats developed transmural necrosis.
