

one of nitro pros main selling points is the file-sharing integration, but theres also a wealth of information and convenience features you can use on the go. first, you can access and edit pdfs from anywhere. even if theres not an internet connection available, you can still open files from any cloud service, including google drive, dropbox, onedrive, and sharepoint 365. when it comes to image editing, the service can also convert a number of file formats ranging from jpeg and tiff to png, extracting both text and images. you can also use nitro pro as a batch converter, which further reduces user hand-holding when youre on the job, and does so on desktops, browsers, or mobile devices. nitro pro functions efficiently on touch-enabled devices as it does on pcs, so its an easy way to navigate and manage pdf documents even while traveling. for most users, the lack of customization features wont be a major detractor, as nitro pro is primarily used for a get in, get out simple purpose. the comprehensive app does a good job of simplifying a commonly frustrating function, and it does so with added security and convenience perks. for a one-stop shop for all things pdf, we recommend giving nitro pro a try, especially since it comes with a free trial period. hello, i would like to know if the current version of nitro pro (12) is able to unlock pdfs. there are certain pdfs that i get or create from other proprietary software that, even though they are basically blank forms, they are generated in a locked format. i then have to use an online pdf converter (online2pdf.com, or something similar) to unlock the pdfs before editing them in my current version of nitro. please let me know if v 12 has capability to unlock pdfs directly. thank you.
